Understanding your request...

Do you have polarized sunglasses? I don't want anything boring.

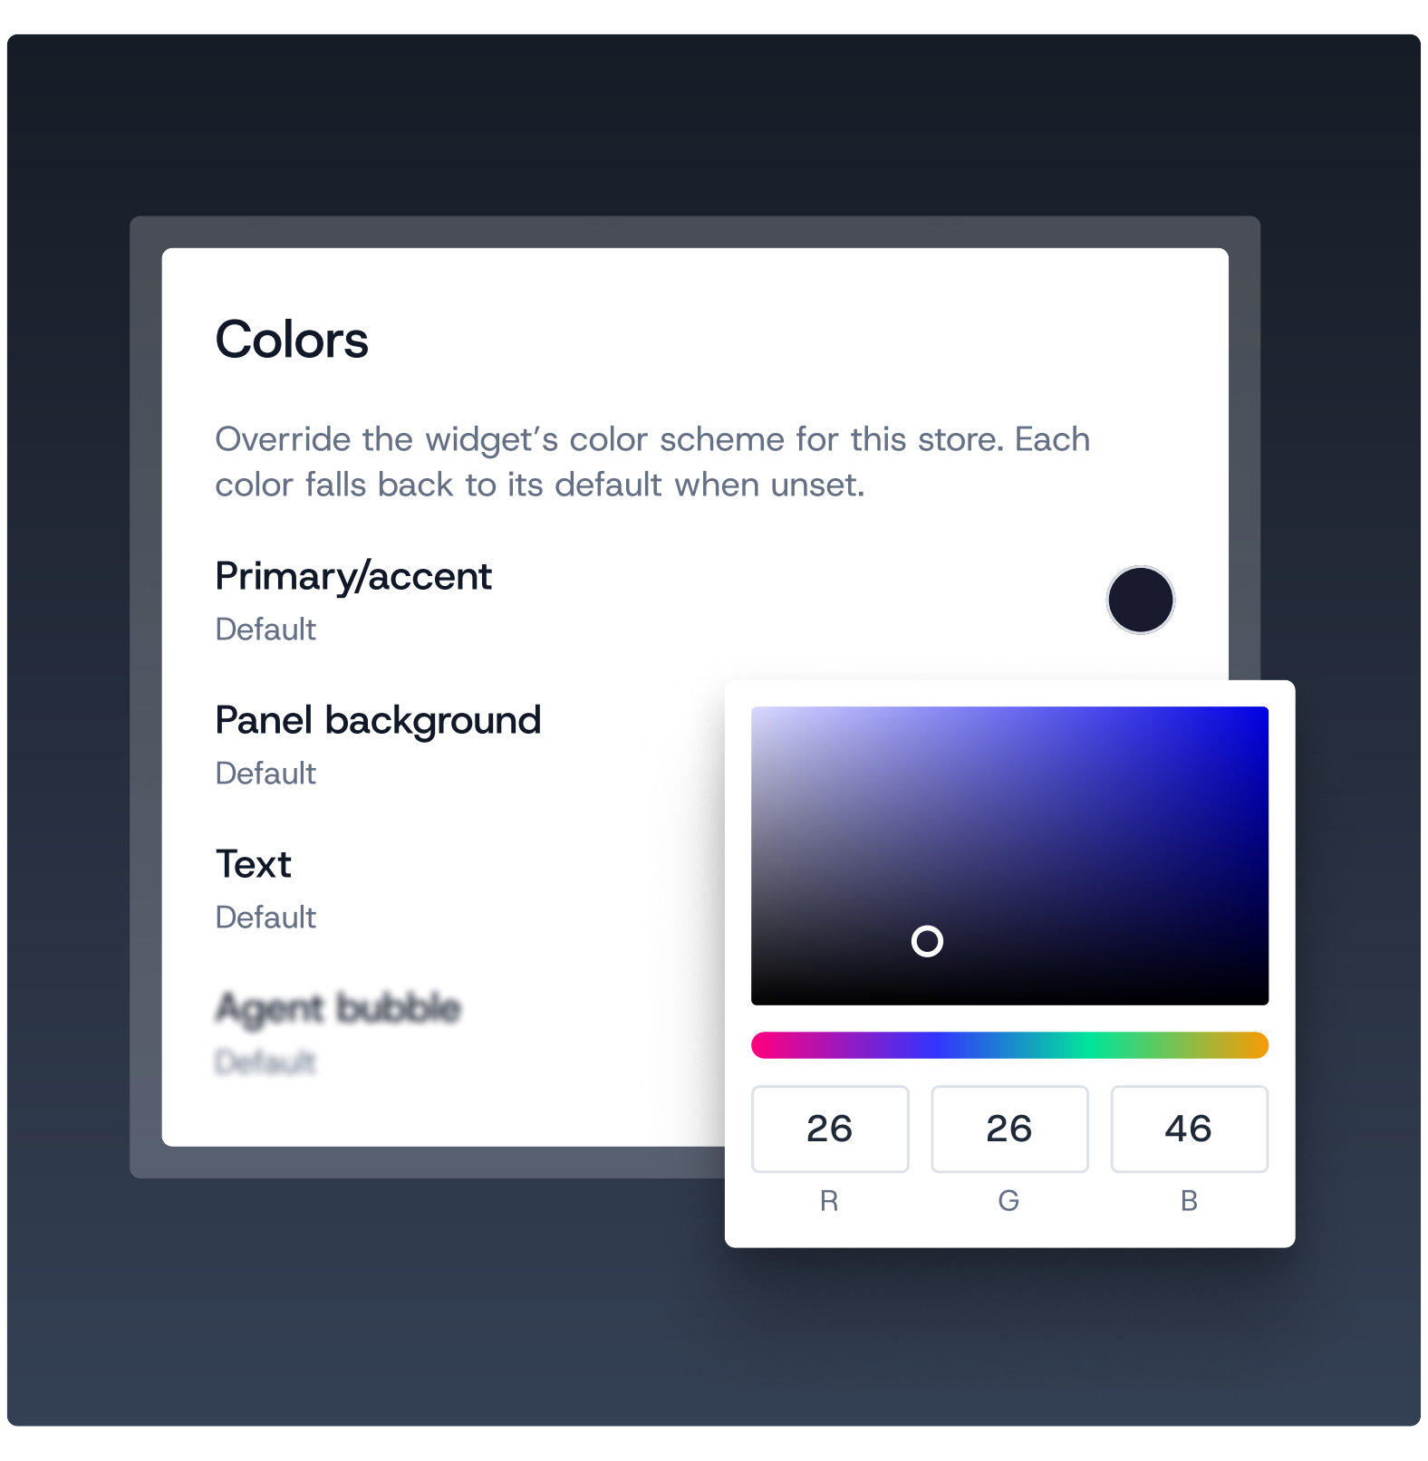
Found two that fit.

Most store visits end in abandoned carts — costing brands billions in lost revenue.

Shopper interest stalls when questions about size, fit, or details go unanswered. Without immediate clarity, purchase intent fades and the sale disappears.

Meeting shoppers early at every step changes everything about the experience.

Shopping Agent keeps conversations natural and responsive—guiding visitors through every hesitation and turning questions into confident buying decisions.



Override the widget's color scheme for this store. Each color falls back to its default when unset.

BUILD YOUR AGENT

Style, customize, and train Shopping Agent.

Configure the agent-to-shopper experience with your brand guidelines, preferred terminology, tone, and response instructions to keep every product answer and recommendation accurate, consistent, and on brand.

WOW YOUR VISITORS

Your agent knows what shoppers want.

Built on the BigCommerce agentic infrastructure, Shopping Agent carries context across the conversation, interprets the intent behind each question, and adapts its guidance as shoppers refine what they need.

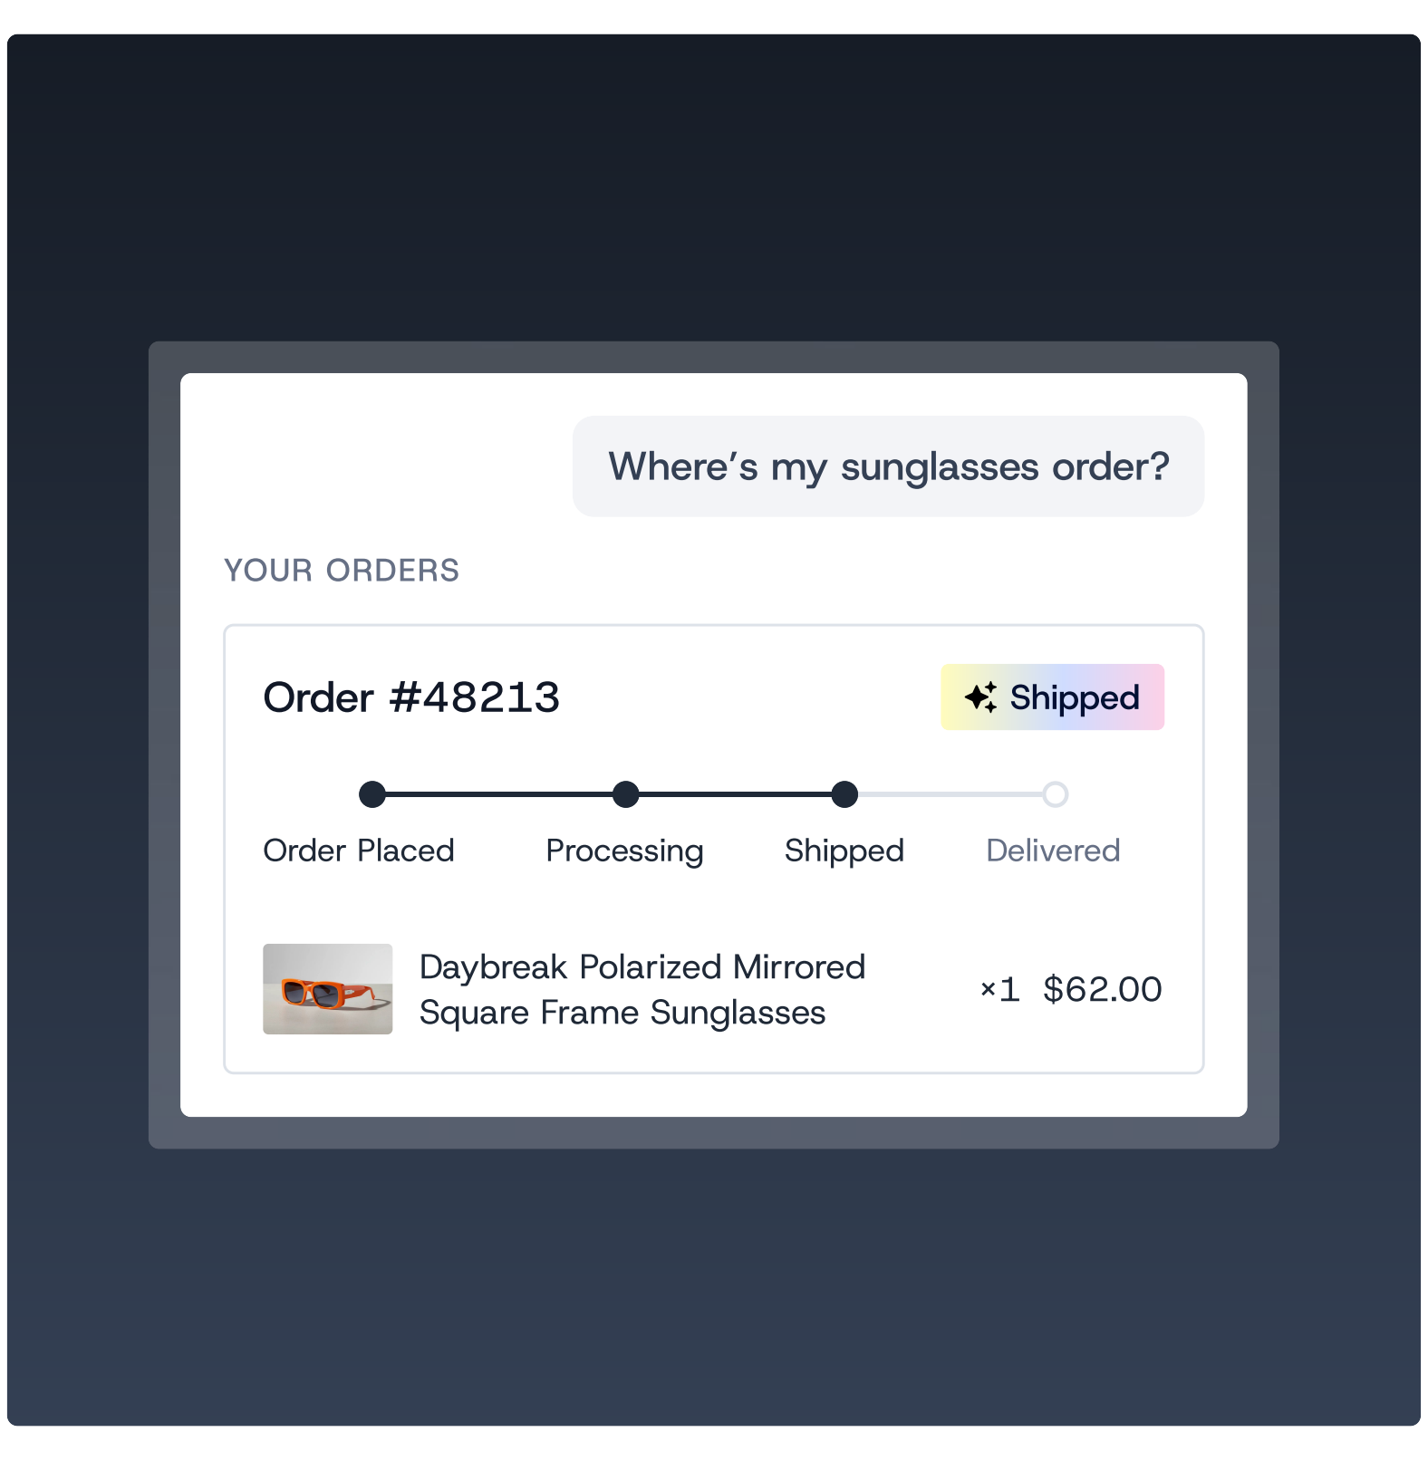
Not sure what I want. Something for the beach, but not boring.

Here are a few that fit.



Where's my sunglasses order?

CONVERT MORE CUSTOMERS

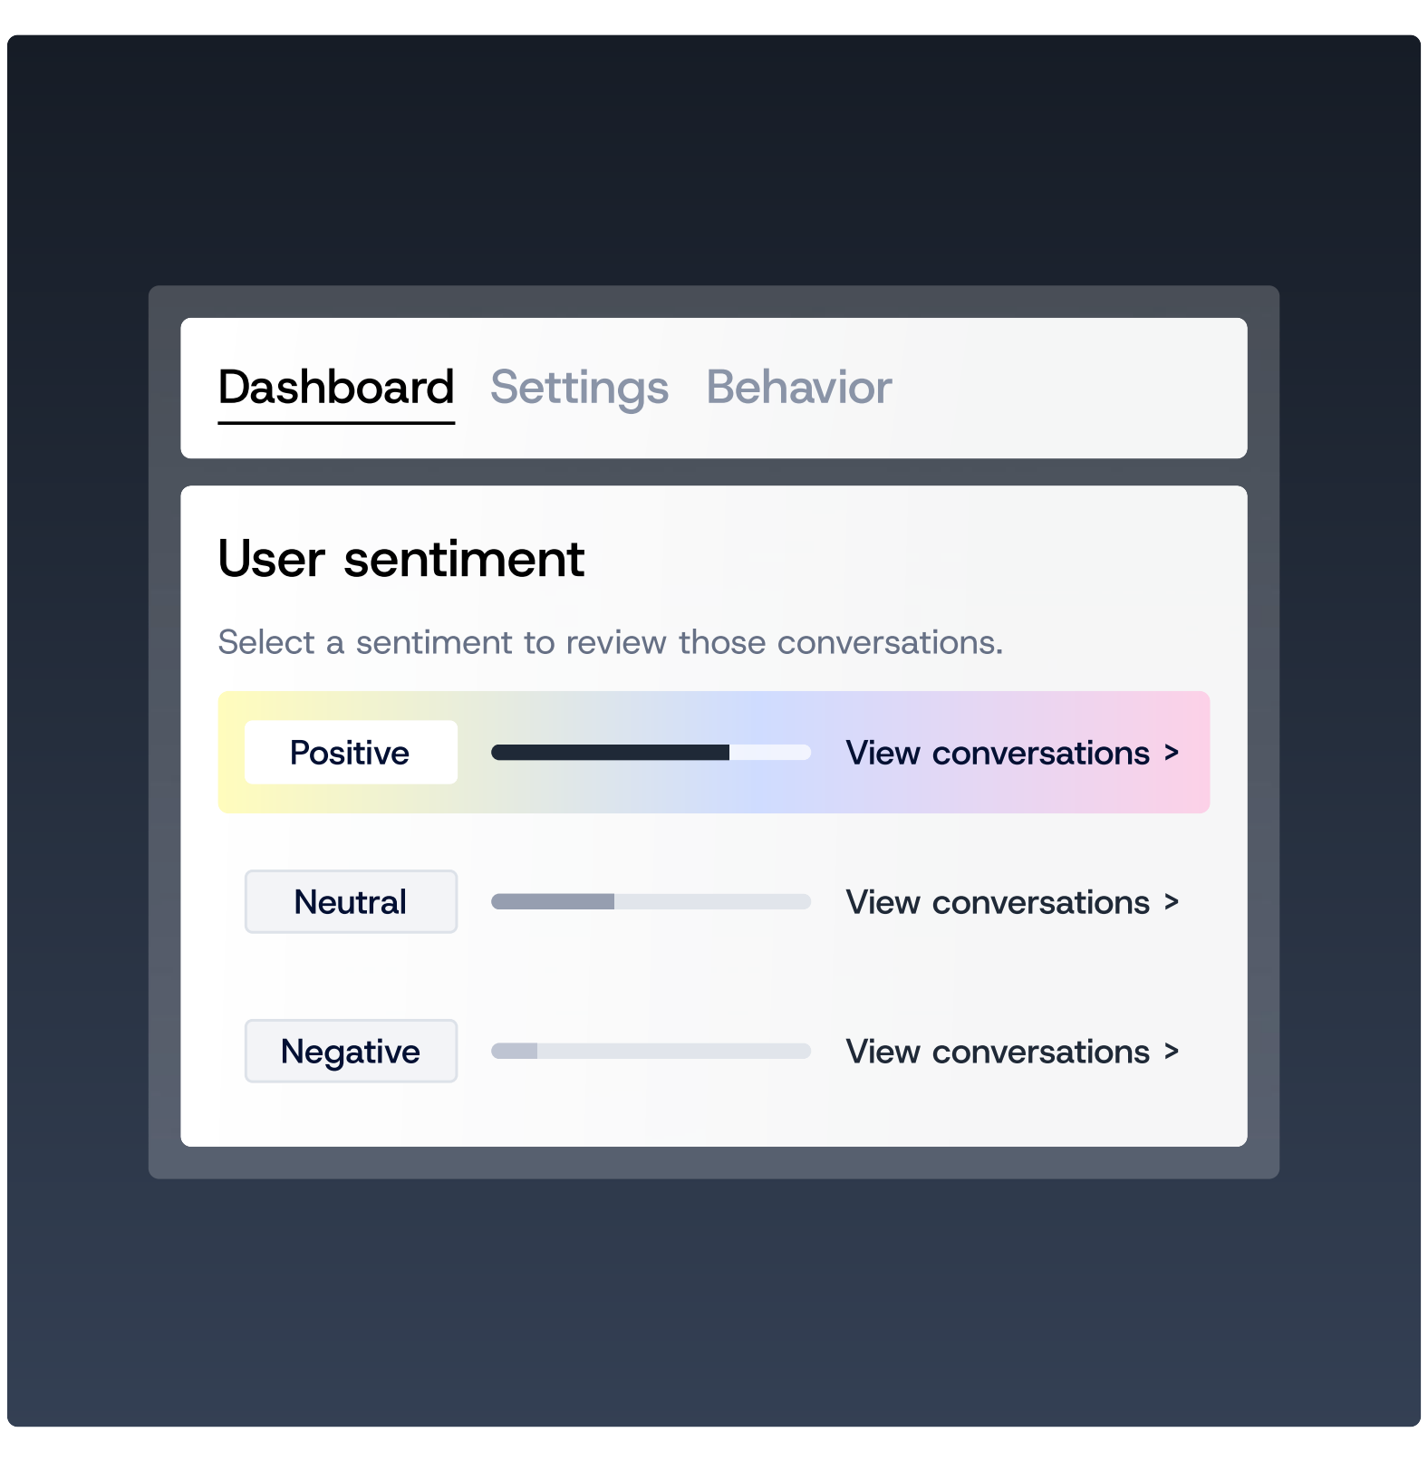
Move from "I'm just shopping around" to customer for life.

Shopping Agent doesn't just guide and support, it builds confidence with shoppers – helping to keep them engaged longer, reduce abandoned cart rates, and improve conversions.

MEASURE & ITERATE

Continuously monitor, adapt, and optimize your agent

Go beyond general understanding and take a closer look at every conversation Shopping Agent handles with detail-rich reporting & analytics.



Select a sentiment to review those conversations.

Turn every conversation into a lifetime customer.

Elevate your storefront experience and convert more shoppers with Shopping Agent.
